MOBILITY SOLUTIONS

Create a bigger world

Space. The B-Active Caddy Maxi 85, with a completely flat floor, has it in abundance. This makes the Volkswagen Caddy Maxi in combination with this conversion kit our most popular wheelchair accessible vehicle. With the spacious interior, you not only provide the wheelchair passenger with more space but also broaden their horizons and create a bigger world.

Convenient features

There are many features designed for maximum user-friendliness, like the belts that can be attached to the wheelchair while it is still outside the Caddy Maxi. An integrated safety feature prevents the wheelchair passenger from rolling backwards on the wheelchair ramp; only upward movement is possible. Super convenient!

Configurations

Everyone can come along! The original 2nd seat row remains in the Caddy Maxi, and it can still be used when transporting a wheelchair passenger. This means that the Maxi can carry five passengers and one wheelchair passenger. If that is not enough, there is still room for a pair of separate seats in the third row, available as an option, allowing you to accommodate a maximum of seven passengers.

B-Active Caddy Maxi 85

The 85 is a more comfortable choice for the wheelchair passenger, because the floor is completely flat. This creates much more interior space, as the distance to the roof is greater compared to the 84+. The wheelchair space is also wider... you guessed it: 85 cm wide. Because the floor is flat, a fuel tank specially designed by B-style is placed elsewhere under the Caddy Maxi.

Personalization Caddy wheelchair car

You can opt for high-quality vinyl on the floor. The sides of can be fitted with an aluminium strip cut to size. A LED strip is available that automatically lights up. Operation of the wheelchair ramp can be made easier with a gas spring, which can be optional be folded inwards in its entirety, so it can lie horizontally to provide extra luggage space.

Inventor of the wheelchair car

With decades in the industry (since 1973), B-style knows exactly what is needed for a wheelchair accessible vehicle. We have thought of everything, such as a comfortable sitting position for the wheelchair passenger, easy entry, safe 5-point belt attachment that meets the strict European requirements, simple, light operation and a beautiful finish.
