MOBILITY SOLUTIONS

## Big family?

A wheelchair does not have to be a limitation for your transportation, because with the Vito / V-Class disability car you enjoy a feeling of luxury together with your entire family. There is plenty of space for all the passengers, and the wheelchair passenger enjoys considerably more room than in an average conversion van.

## Luxury wheelchair taxi

Looking for a high-end wheelchair taxi for the daily transport of a wheelchair passenger and others in class? Then you have found it in the B-Active Mercedes-Benz V-Class L3, which is perfect for professional use. Both the vehicle and the wheelchair conversion are of unparalleled quality. Having performed numerous tensile and endurance tests, B-Style guarantees the durability of components.

## Seat configurations

The L2 version has space for three rows of seats, and the L3 can have 4 rows. The first two rows of seats remain original Mercedes-Benz. The third row has optional folding seats, one on each side, for a total of two. These seats can only be used when there is no wheelchair passenger.

## Personalization options

For the interior, you can opt for high quality, wear-resistant vinyl on the floor of the lowered floor area, and the walls can be fitted with an aluminium strip or made-to-measure ABS caps. The wheelchair area can be illuminated with a LED strip. To make the ramp as light as possible in operation, it can be fitted with a gas spring. Both the RWD and 4x4 drive train are suited for the B-Active kit.

## Wheelchair Ramp

One of the ramp options is what is called the 'folding tip'. The end folds back for better visibility to the rear through the rear-view mirror. This also extends the ramp, which makes entry even easier for the wheelchair passenger.

## Invisible low floor

This WAV-kit is beautiful finished. The rear bumper is attached to the tailgate, so the lowered floor has hardly any impact on the exterior appearance. The original parking sensors are replaced.
