MOBILITY SOLUTIONS

Wheelchair ramp, clear rear vision

To grant easy access we offer a wheelchair ramp with a folding tip to enable a longer ramp but without disturbing the rear vision. Optional this ramp can be lightweight and it is covered with an anti-skid surface. Operation of the wheelchair ramp can be made easier with a gas spring.

Opel Combo wheelchair taxi

The Opel Combo is very suitable for professional use as a wheelchair taxi. The belts can be attached to the wheelchair outside the Combo and can then only retract, not extend. Thanks to this safety feature, the wheelchair passenger cannot roll back down the wheelchair ramp.

Wheelchair tie down system

The wheelchair tie down system meets the requirements of ISO 10542. An automatic three-point safety belt is naturally provided as an option for the wheelchair passenger. This heavy duty restraints can handle up to 200 kg.

Custom suspension set

A unique feature of this kit is the suspension set specially developed by VB, which ensures perfect handling under all circumstances and a comfortable ride. This suspension set is included with the B-Active kit.

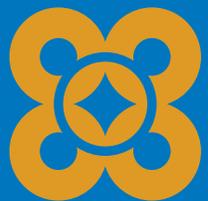

Seating configuration

The B-Active is very flexible, thanks to various configuration options. No changes are made to the front passenger seats. For the second row, you can choose one or two separate seats or none at all. The seats on the second row of seats are narrower, so the wheelchair passenger's legs fit between them. The maximum number of passengers for the combo is therefore four, plus the wheelchair passenger.

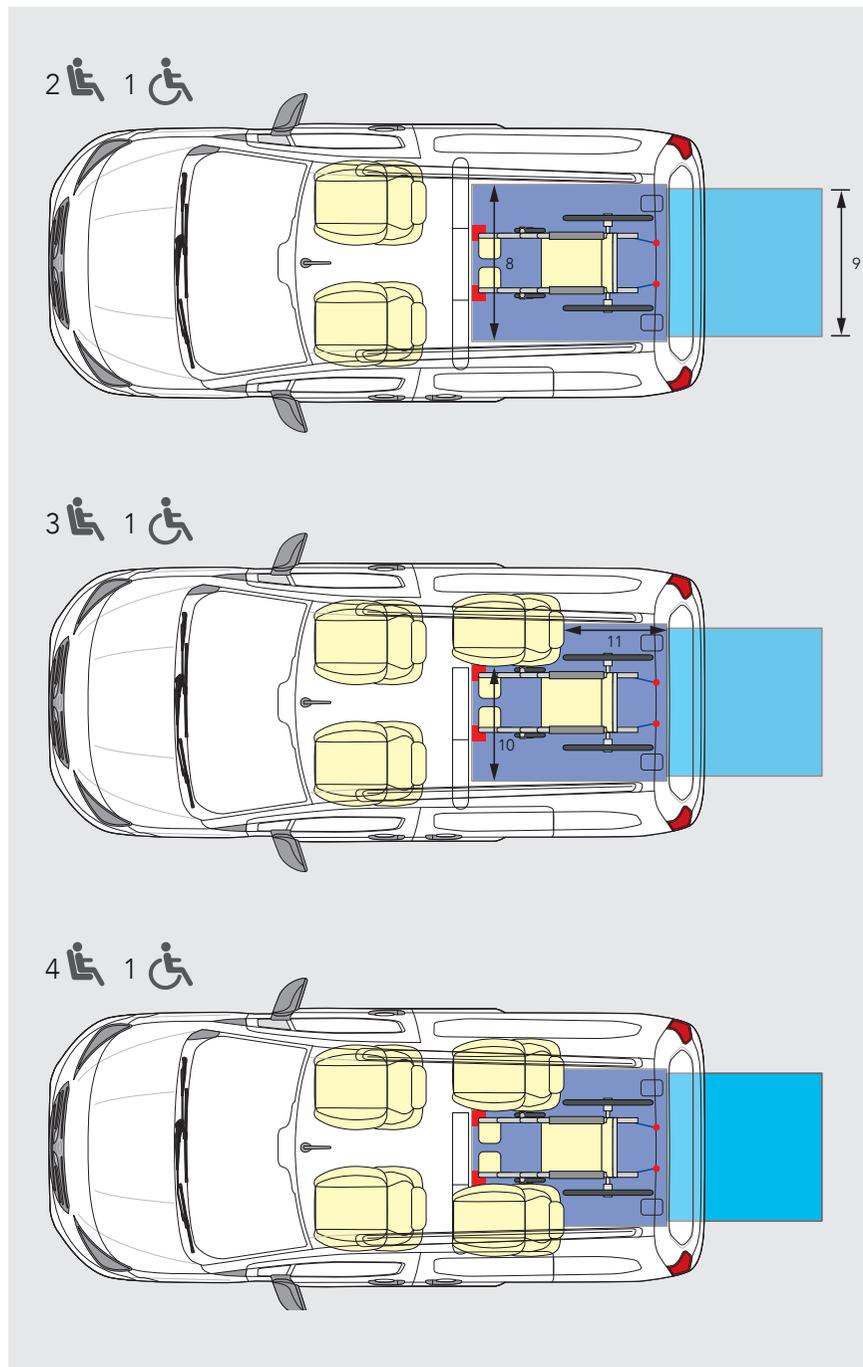

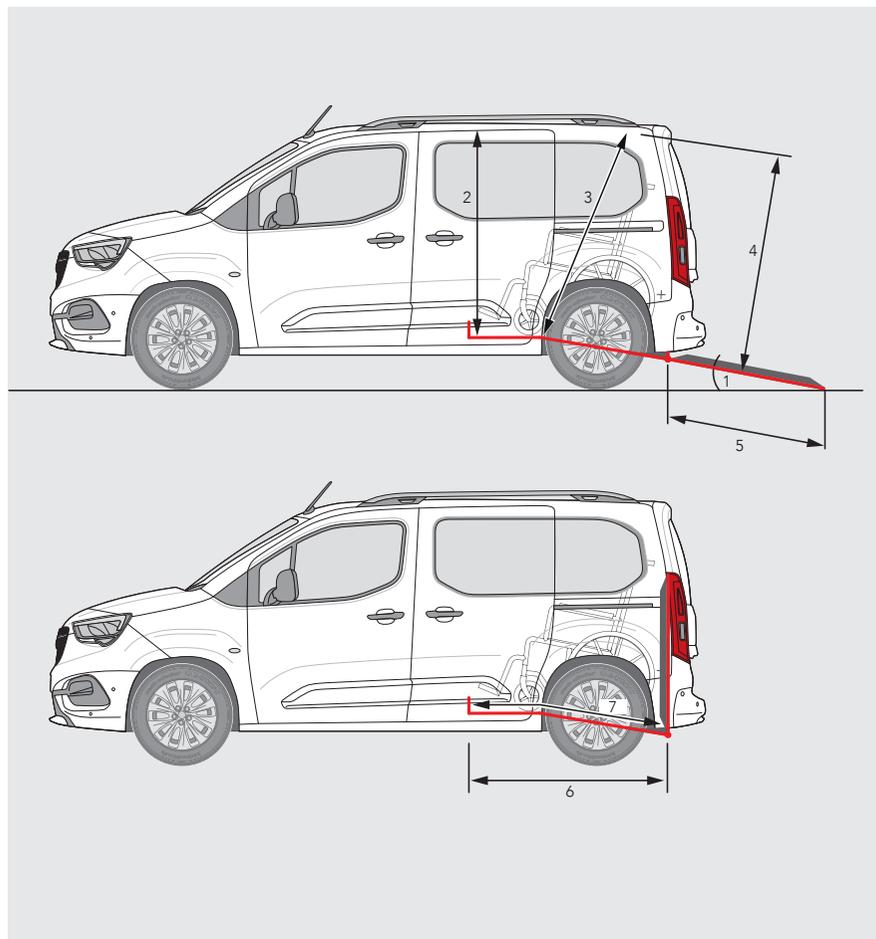

Invisible low floor

The rear bumper is attached to the tailgate, so the lowered floor has hardly any impact on the exterior appearance. The original parking sensors are replaced.
